EXPERIENCE

An experienced senior manager and broadcast systems engineer with extensive knowledge of a wide range of broadcast infrastructure and an understanding of RF transmit and receive systems. Methodical, determined and flexible approach to work. Enjoying the challenges of complex projects, meeting the demands of various clients and forging strong working relationships within and across departments.

2017 to present United Kingdom

Ampersand Broadcasting

Freelance Outside Broadcast Technical Engineer.

After working for Globecast for over 20 years, now director, owner and engineer for myself, focusing on aspects of the job I really enjoy.

1998 to 2017 United Kingdom

Globecast UK

Senior Broadcast Technical Engineer Manager

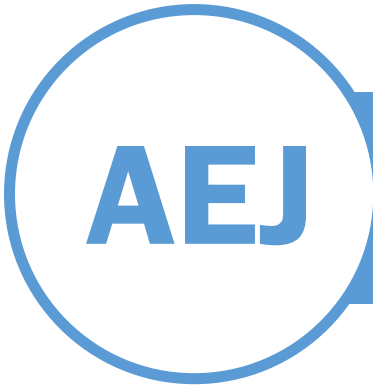

Team management of engineers, administration staff, senior broadcast transmission, and production engineer. Principle client engagement and end-to-end global event management, including all new rig and vehicle designs, quotation and builds, hands-on and worldwide team support. In addition, extensive work in the field on numerous events throughout the world.

1995 to 1998 South Africa

Globecast SA (prev. Newsforce SA)

Senior Broadcast Technical Engineer (promoted from Junior)

Primarily working on cricket tours in Africa and India, working on C-band Satellites.
